

Upper Hanover Township

Re-Roofing Permit

Re-roofing projects involving 25% or more of the total existing roof square footage require a permit issued by the Township. The following requirements apply for this permit:

1. Ice shield must be installed at all eaves.
2. 50% of roof venting must be located in the top 1/3 of the roof area.
3. A maximum of two (2) layers of shingles is allowed on any existing roof.
4. Proof of insurance is required by all contractors before the start of the project.
